TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

'Edward Goucher' Abelia

Abelia × grandiflora 'Edward Goucher'

Plant care guide

SUN
Full sun to part shade

WATER
Low once established

MATURE SIZE
2–5 ft tall, 3–5 ft wide

BLOOM TIME
Summer to fall · lavender-pink

USDA ZONE
6–9 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Sun gives the most flowers; space 3-4 ft.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** drought tolerant once established.
Soil & Mulch	Moist, well-drained soil. 2–3 in. of mulch, off the stems. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Prune in late winter;** remove a few old stems to renew.
Lowcountry Tip	Long summer-to-fall bloom; bees and butterflies love it. Deer resistant.
