TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

Golden Sedum

Sedum rupestre

Plant care guide

SUN
Full sun to part shade

WATER
Low once established

MATURE SIZE
4–6 in. tall, 1–2 ft wide

BLOOM TIME
Summer · small yellow

USDA ZONE
5–9 · fits 8b/9a

Planting	**Spring to fall.** Plant at the same depth in sandy, fast-draining soil. Space about 1 ft apart.
Watering	**Water deeply, then let dry** before watering again.
Soil & Mulch	**Sandy or gravelly soil; raised beds help.** Gravel or light mulch, kept off the stems.
Fertilizer	**Little needed;** a light feeding in spring.
Pruning	**Remove spent flower stalks** and any dead leaves.
Lowcountry Tip	Gold needle-like leaves take on orange-red tips in cool weather. Deer usually leave it alone. Never let it sit in wet soil.
