TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

'Little Princess' Spirea

Spiraea japonica 'Little Princess'

Plant care guide

SUN
Full sun · 6+ hrs

WATER
Moderate

MATURE SIZE
2–3 ft tall & wide

BLOOM TIME
Late spring to summer · pink

USDA ZONE
4–8 · zone 8 edge: give afternoon shade

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Full sun; afternoon shade helps in our heat. Space 2-3 ft.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** water weekly in summer heat.
Soil & Mulch	Average, well-drained soil. 2–3 in. of mulch, off the stems. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Shear off spent blooms for a second flush;** cut back in late winter.
Lowcountry Tip	Low pink-flowered mound; leaves turn red in fall. Blooms on new wood.
