Canary Island Date Palm

Phoenix canariensis

Plant care guide

SUN
Full sun

WATER
Low once established

MATURE SIZE
40–60 ft tall, 20–40 ft wide

BLOOM TIME
Spring • cream/tan, yellow

USDA ZONE
9–11

Planting	**Best in late spring and summer.** Plant at the same depth it grew; never bury the trunk.
Watering	**First months:** water often to keep the root ball moist. **Established:** water in dry spells.
Soil & Mulch	Well-drained, sandy soil. 2–3 in. of mulch, off the trunk.
Fertilizer	**Palm food** with magnesium and potassium, spring and summer.
Pruning	**Remove only fully brown fronds;** no "hurricane cuts."
Lowcountry Tip	Salt tolerant, a good pick near the coast. Protect young palms in a hard freeze. Do not cut green fronds; they feed the palm.
