TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

Sweet Viburnum

Viburnum odoratissimum

Plant care guide

SUN
Full sun to part shade

WATER
Moderate

MATURE SIZE
10–20 ft tall, 15–20 ft wide

BLOOM TIME
Mid-spring · white

USDA ZONE
7–9 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. It gets big, so leave room for a 15 ft spread.
Watering	**First weeks:** water every 2–3 days when the top inches dry. **Established:** deep soak even established plants in long dry spells.
Soil & Mulch	Moist, rich, slightly acidic soil (pH 5.5–6.5). 4–6 in. pine straw or 2–3 in. bark. Ask us about Taylor's soil and mulch.
Fertilizer	**Light spring feeding** with slow-release shrub food; skip late-season feeding.
Pruning	**Prune after the spring bloom** to shape or control size. Fast growth means a yearly trim for hedges.
Lowcountry Tip	A fast privacy screen for the Lowcountry. Lightly fragrant white clusters in spring; birds eat the red-to-black fruit.
