TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

Fatsia

Fatsia japonica

Plant care guide

SUN
Part shade to shade

WATER
Moderate

MATURE SIZE
6–10 ft tall, 4–6 ft wide

BLOOM TIME
Fall · white ball clusters

USDA ZONE
7b–10 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Shade or part shade; afternoon sun scorches the leaves.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** water in dry spells; keep evenly moist.
Soil & Mulch	Moist, rich, well-drained soil. 2–3 in. of mulch, off the stems. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Cut old or leggy stems to the ground in late winter.**
Lowcountry Tip	Big tropical-looking leaves for shade. Salt tolerant; white fall flowers.
