TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

# 'Steeds' Holly

*Ilex crenata* 'Steeds'

Plant care guide

**SUN**
Full sun to part shade

**WATER**
Low once established

**MATURE SIZE**
5–10 ft tall, 5–8 ft wide

**BLOOM TIME**
Spring · green, white

**USDA ZONE**
5–8

| | |
|---|---|
| **Planting** | **Best in fall.** Dig 2–3× as wide as the root ball, no deeper; set it level. Space about 6 ft apart. |
| **Watering** | **First months:** keep the root ball moist, not soggy. **Established:** drought tolerant; soak in long dry spells. |
| **Soil & Mulch** | Well-drained soil. 2–3 in. of mulch, off the trunk. Ask us about Taylor's soil and mulch. |
| **Fertilizer** | **Water, not food, matters most at first.** Feed in spring only if growth is weak; use slow-release. |
| **Pruning** | **Prune lightly to shape;** flowering plants right after bloom. |
| **Lowcountry Tip** | Deer usually leave it alone. Drought tolerant once rooted in. Sandy soil dries fast, so check new plants often. |
