TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

Indian Hawthorn

Rhaphiolepis indica

Plant care guide

SUN
Full sun to part shade

WATER
Low once established

MATURE SIZE
4–6 ft tall & wide

BLOOM TIME
Spring · pink-white clusters

USDA ZONE
8–10 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Full sun gives the most flowers; space 3-4 ft.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** drought tolerant; water in long dry spells.
Soil & Mulch	Sandy to loamy, well-drained soil. 2–3 in. of mulch, off the stems. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Little needed;** trim lightly right after spring bloom.
Lowcountry Tip	Very salt and wind tolerant. Water at the base and give air flow to limit leaf spot.
