TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

Southern Red Cedar

Juniperus virginiana var. silicicola

Plant care guide

SUN
Full sun

WATER
Low once established

MATURE SIZE
30–45 ft tall, 20–30 ft wide

BLOOM TIME
Non-flowering evergreen

USDA ZONE
8–10 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or 2–4 in. high in poor drainage. Made for the coast: dunes, sandy yards and marsh edges.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** very drought tolerant; avoid soggy, overwatered spots.
Soil & Mulch	Any texture, pH 4.5–8.0, as long as it drains. 2–4 in. of mulch, off the trunk. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Little needed.** Its drooping branch tips give it a soft, graceful look.
Lowcountry Tip	A Lowcountry native with high salt tolerance. Wind resistance is low, so site it with care near buildings.
