TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

‘Firepower’ Nandina

Nandina domestica ‘Firepower’

Plant care guide

SUN
Full sun to part shade

WATER
Low once established

MATURE SIZE
2–3 ft tall & wide

BLOOM TIME
Not showy · red winter foliage

USDA ZONE
6–9 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Full sun for the best red color; space 2-3 ft.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** drought tolerant; water in long dry spells.
Soil & Mulch	Well-drained soil; adapts to most soils. 2–3 in. of mulch, off the stems. Ask us about Taylor’s soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Little needed;** cut back leggy stems in late winter.
Lowcountry Tip	Leaves turn fiery red in cool weather. Toxic to pets if eaten.
