TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

Texas Sage

Leucophyllum frutescens

Plant care guide

SUN
Full sun · 6+ hrs

WATER
Low · very drought tolerant

MATURE SIZE
6–12 ft tall & wide

BLOOM TIME
Summer to fall · lavender flushes

USDA ZONE
8–11 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Full sun; plant a little high.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** very drought tolerant; overwatering kills it.
Soil & Mulch	Sandy or gravelly, fast-draining soil. No wet spots. 2–3 in. of mulch, off the stems. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Shape lightly in spring;** avoid tight shearing.
Lowcountry Tip	Lavender blooms follow summer rains. Salt and deer tolerant.
