TAYLOR'S
LANDSCAPE SUPPLY & NURSERY

'Mrs. Schiller's Delight' Viburnum

Viburnum obovatum 'Mrs. Schiller's Delight'

Plant care guide

SUN
Full sun to part shade

WATER
Low once established

MATURE SIZE
3–6 ft tall & wide

BLOOM TIME
Late winter to spring · white clusters

USDA ZONE
6–10 · fits 8b/9a

Planting	**Best in fall.** Dig 2–5× as wide as the root ball, no deeper; set it level or slightly high. Sun to part shade; space 3-4 ft for a low hedge.
Watering	**First months:** keep the root ball moist, not soggy. **Established:** drought tolerant; also takes short wet spells.
Soil & Mulch	Most soils, sandy to wet. 2–3 in. of mulch, off the stems. Ask us about Taylor's soil and mulch.
Fertilizer	**Water, not food, matters most at first.** Feed only if growth is weak or a soil test calls for it; use slow-release.
Pruning	**Light trims keep it compact;** shape after bloom.
Lowcountry Tip	SC native dwarf Walter's viburnum. Evergreen here; deer resistant.
